1:30PM-2:30PM

Strategies and Innovations for Addressing the Requirements of Proposition 65 and Other Consumer Product Regulations

The session provides guidance and case studies related to both proactive (e.g., company initiated) and reactive (e.g., responding to regulatory requirements) chemical product safety programs. Speakers will address changes under California's Proposition 65, as well as the growing number of product disclosure regulations in the US. Discussion includes some of the challenges that have been observed in applying risk and exposure assessment strategies in this context.
